

## What is Whiting Ranch?

Contributed by Roger

Limestone Canyon & Whiting Ranch Wilderness Park encompasses over 4,300 acres of Riparian and Oak Woodland canyons, rolling grassland hills and steep slopes of Coastal Sage Scrub and Chaparral. The park is highlighted by scenic rock formations, including the beautiful Red Rock Canyon. There are five intermittent streams: Borrego, Serrano, Aliso Creek, Santiago Creek and Aqua Chivera meandering through the park, each hosting an abundance of wildlife. Remnants of the former cattle ranching days can be seen throughout the park.
